

Peer Review for Cequence Application Security Platform

Vendor Overview

“Cequence Review”

Submitted: November 20, 2020

Overall User Rating

★★★★★ Product(s): Cequence Application Security Platform

Overall Comment: “My company is using the Cequence platform for Bot Mitigation. We chose Cequence after extensive market research and found the Cequence AI platform to offer the best solution for the attacks we most often face. The leadership team at Cequence is engaged and listens to of feedback. Cequence has a very talented team of engineers and threat analysts who can quickly resolve bot attacks without disrupting valid customer traffic. Overall, we are very pleased with the Cequence product and equally pleased with the Cequence team.”

Lessons Learned

What do you like most about the product or service?

The Cequence AI platform was very easy to onboard and integrate into our security operations. The Cequence AI platform dashboard is very user friendly and easy to understand for both technical analysts and non-technical managers alike. Likewise, the Cequence team is engaging and very helpful in offering workable solutions to bot attacks. The threat analysts at Cequence have superior knowledge and expertise in this space and have deep knowledge of attacker tradecraft.

What do you dislike most about the product or service?

None.

Please explain the business problems or needs that prompted the purchase of this product or service.

Our company was seeing an increase in bot attacks that our current solution wasn't detecting.

If you could start over, what would your organization do differently?

We would onboard Cequence earlier in our bot mitigation journey.

What one piece of advice would you give other prospective customers?

Take a close look at the Cequence product when comparing other products on the market. In addition to the platform, assess other company's management and technical teams.
